Amendments to the Claims

1. (canceled) 2. (canceled) 3. (canceled) 4. (canceled) 5. (canceled) 6. (canceled) 7. (cunceled) 8. (canceled) 9. (canceled) 10. (canceled) 11. (Currently amended) A process for making an aqueous composition comprising; I) combining, A) 2 to 50 wt% of an (AB)_n block silicone polyether copolymer having the average formula; $-[R^{1}(R_{2}SiO)_{x}(R_{2}SiR^{1}O)(C_{m}H_{2m}O)_{y}]_{z}$ where x ranges from 30 to 75, y is greater than 4, the value of x/(x+y) ranges from 0.2 to 0.9, m is from 2 to 4 inclusive, z is greater than 2, R is independently a monovalent organic group, R¹ is a divalent hydrocarbon containing 2 to 30 carbons, B) 2 to 30 wt % of a water miscible volatile solvent selected from methanol, ethanol, isopropanol, or propanol, with sufficient amounts of water to provide the sum of the wt% of A). B). and water to equal 100% water to form an aqueous dispersion, II) mixing the aqueous dispersion to form vesicles of the (AB)_n silicone polyether copolymer having an average particle size of less than 10 micrometers, III) optionally removing the water miscible volatile solvent from the aqueous dispersion. 12.
